eCredits news

About eCredits

The eCredits Ecosystem is being introduced in an initial rollout by various partners and is being docked into existing retailer structures. In this way, the eCredits Ecosystem offers an exclusive advantage for large collectives that can adopt ECS as an alternative means of payment within their systems. Major adaptation and harmonization projects will have to be mastered on the technical side. In parallel, corresponding training platforms and merchant marketing support materials are being created to enable every user to quickly and successfully get started with eCredits. The eCredits Ecosystem is supported by an independent organization that allows for the decentralization of its decision-making and governance, making the eCredits Ecosystem a truly community-driven ecosystem. This ensures the existence of the eCredits Blockchain and ECS beyond all developments and establishes the inherent stability of this system.
